

ALIF WAHYU SYAHNANDA

Jakarta, Indonesia | +6287851734577 | awsyahnanda@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Analytical and growth-oriented professional with proven experience in data analytics, product operations, and user behavior analysis. Skilled in turning complex data into actionable business insights to drive product development, optimize funnels, and increase user engagement. Proficient in SQL, Metabase, Amplitude, Python, and modern analytics tools with a track record of driving measurable impact in SaaS and tech-enabled distribution platforms.

PROFESSIONAL EXPERIENCE

PT. Baskit Technology Aplikasi

Baskit is Indonesia's fastest-growing Seed Funded (US\$4.1mio raised) tech-enabled solutions for distribution, financing, and omnichannel execution in supply chain.

Product Growth Analyst

May 2025 – Present

- Developed CRM dashboards and automated growth reports in Metabase, enabling real-time visibility into user acquisition, activation, and conversion performance.
- Designed and executed acquisition and referral strategies, resulting in 11,000+ registered users and 400+ distributor merchant partners.
- Conducted funnel drop-off and cohort analysis using Amplitude, identifying user behavior trends to prioritize product features and UX improvements.
- Initiated in-app user feedback system and drove a web revamp strategy that increased website traffic by 60%.
- Led product growth roadmap aligned with company OKRs; ran weekly growth experiments that improved user adoption rate by 10% and reduced CAC by 30%.
- Mentored cross-functional teams on data-driven decision-making and integrated insights into product development.

Product & Data Operations

Jan – May 2025

- Owned and managed ETL process from AWS production databases into centralized data warehouse for reporting and dashboarding in Metabase.
- Collaborated with Data Engineers and DevOps to design scalable data marts supporting operational, business, and product KPIs.
- Authored detailed Business Requirements Documents (BRD) for mobile Sales Force Automation (SFA) and web ERP modules, accelerating product development cycles by aligning tech and business.
- Built and maintained dashboards tracking AARRR (Acquisition, Activation, Retention, Referral, Revenue) metrics including MQLs, DAU, MAU, TFV, and CLV.
- Led the creation of a product onboarding playbook that reduced user Time to First Value by 20%.
- Implemented and monitored event tracking in Amplitude and coordinated A/B testing for product experiments.
- Managed sprint planning and task allocation in Jira, maintaining 95% average sprint velocity and delivery capacity.

Operations Business Analyst

Oct 2024 – Dec 2024

- Conducted data analysis and operational monitoring across distribution channels (GT, MT, FMCG, Fashion, Beauty), evaluating key metrics like GMV, AOV, Churn Rate, AR/AP, and Fill Rate.
- Built customer behavior dashboards in Metabase, identifying purchasing patterns and loyalty drivers, increasing AOV by 10%.
- Created sales performance dashboards in Looker Studio to track field activity, fraud signals, and territory performance, improving weekly sales output by 15%.
- Delivered product performance insights per region and initiated brand and loyalty programs, driving 10% monthly growth on underperforming SKUs.
- Designed and executed CSAT surveys and field assessments that improved customer satisfaction scores to 80%.
- Produced profit margin analysis reports by transaction and product category to inform Area Sales Manager strategy, boosting regional net profit by 5%.

Purwadhika Digital Technology

Junior Data Scientist (Apprenticeship)

Feb – Aug 2024

- Built machine learning models for customer churn prediction and car price forecasting using Python, SQL, and scikit-learn.
- Delivered customer segmentation using RFM and cohort analysis for targeted marketing and retention strategies.
- Developed dashboards in Tableau to present actionable insights to non-technical stakeholders.
- Supported end-to-end data pipeline and feature engineering for supervised and unsupervised learning projects.
- Successfully reduced acquisition and retention costs by 69.8% for an e-commerce client.

Pou Chen Group Indonesia

Sustainability Development & HSEE Officer

Mar 2022 – Dec 2023

- Led the digital transformation of safety and sustainability reporting using Google Suite, managing 5,000+ data points monthly.
- Reduced workplace incidents by 25% annually by building automated dashboards and safety metrics.
- Prioritized and rectified risks on 3,000+ machinery units, moving overall risk levels from High to Low.
- Delivered monthly health, safety, and energy performance insights using Excel and ENABLON to support operational improvements.

PROJECT EXPERIENCE

- **E-Commerce Customer Churn Analysis and Classification Predictive Modeling Approach to Reduce Acquisition and Retention Cost**
E-commerce Churn Analysis: Built churn prediction model and business dashboard, reducing acquisition and retention costs by 69.8%.
([Deck](#) | [Source Code](#))
- **Used Car Prices in Saudi Arabia Analysis & Predictive Modeling Regression Approach**
Used Car Price Prediction: Developed regression model (MAE: 15,767 SAR; MAPE: 1.2%) for price estimation of secondhand vehicles.
([Deck](#) | [Source Code](#))
- **Supermarket Market Customers Analysis Using RFM (Recency, Frequency, Monetary) to Tackle Campaign Promotion Ineffectiveness**
Supermarket RFM Segmentation: Segmented customers to identify target profiles for reactivation campaigns and personalization.
([Deck](#) | [Source Code](#))
- **SYNERE Start-up (Digital Energy Audit Platform & Electrical Planning Solution)**
I initiated and developed an application and website to significantly reduce electricity consumption expenditure, targeting a 65.4% cost reduction for industries and housing. This involved extensive market research (250,000+ PLN customers experiencing 200% cost increases) and developing robust business strategies using the BMC.

EDUCATION

Purwadhika Digital Technology School
Data Science & Machine Learning

Feb – Aug 2024

Politeknik Elektronika Negeri Surabaya

Jul 2017 – Jul 2021

Bachelor of Applied Energy Engineering Degree | [Credential](#) | [Thesis](#)

Undergraduate Thesis: “**Design of Steam Power Plant Condenser Machine Maintenance Using RCM (Reliability Centered Maintenance) Methods with RCPS Implementation**”

COURSE & CERTIFICATION

- **AWS Cloud Practitioner Essentials** – AWS training and certification | [Link](#) 2024
- **Designing Event-Driven Architectures** – AWS training and certification | [Link](#) 2024
- **Fundamentals of Analytics on AWS** – AWS training and certification | [Link](#) 2024
- **Data Science & Machine Learning** – Purwadhika Digital Technology School | [Link](#) 2024
- **Python Data Science** – Sanbercode | [Link](#) 2024
- **Google Analytics** – Google Academy | [Link](#) 2023 – 2026
- **Product Management** – Apiary Academy | [Link](#) 2024
- **Turning Data into Product Strategy and Business Decision Making** – Apiary Academy | [Link](#) 2023
- **Project Management** – Teknokrat Muda Indonesia | [Link](#) 2022

ACHIEVEMENTS

International Electronics Symposium (IES) 2021 (September 29th – 30th 2021) | [Publication](#)
International Level

1st Winner of DPR-RI National Short Movie Award 2017 | [Credential](#) | [Source](#)
National Level
